

Abzu & Clay

× Fossil Compression

The fourth iteration of the Yuri OS instrument abandons the JARVIS panel grammar and the radial explosion graph in favor of a **mirrored axis**: Authority Tree on the left, Data Flow on the right, separated by a single luminous spine. Identity is sourced from Sumerian first principles (ABZU, the freshwater abyss; CLAY, the fashioned substrate) and pressed through a fossil-compression palette — geologic time made legible.

PALETTE · SEVEN TOKENS

ABZU VOID	ABZU DEEP	CLAY GOLD	CLAY FIRE	FOSSIL MIST	FOSSIL EARTH	FOSSIL BONE
#080808	#1E3A8A	#D4AF37	#C95A3B	#A8BCC6	#4A3B32	#F2E9D2

MYTHIC ANCHOR

ABZU — the primordial freshwater under the earth, in Sumerian cosmology the dwelling of ENKI. Source of wisdom, of *me* (encoded ordinances). Rendered here as the deep blue (#1E3A8A) recessed into void.

CLAY — the substrate from which NUDIMMUD fashions likenesses of minds. Rendered as the gold–fire axis (#D4AF37 / #C95A3B): warm, hand-shaped, intentional.

MATERIAL ANCHOR

Fossil compression — geologic time as visual logic. Layers compress; old detail remains visible under transparency; the system reveals its own strata. Rendered as mist (#A8BCC6) over earth (#4A3B32) over bone (#F2E9D2).

Not flat. Not skeuomorphic. Compressed. The instrument shows pressure as it shows function.

CONCEPT

The mirror, not the switch

Earlier iterations expressed the Authority Tree and the Data Flow as separate views. A toggle was proposed; the user rejected it. Instead, the canvas is bisected by a vertical spine at $x = 960px$. The left half renders the **authority hierarchy**; the right half renders the **data fan-out**. The two are not alternatives — they are the same system seen from opposing directions.

LEFT · AUTHORITY TREE ENKI at the top spine. OPENCLAW, HERMES, ARGUS, OBLITERATUS, CASSANDRA, SWARM, OC_AGENT branch downward as a canonical tree fan-out — every gold edge denotes invocation authority. Severity bound at the OPENCLAW node (bridge_advisory cap, HIGH). <table><tr><td>edge</td><td>solid gold</td></tr><tr><td>direction</td><td>enki ↘ leaves</td></tr><tr><td>node-shape</td><td>hexagon (sealed)</td></tr></table>	edge	solid gold	direction	enki ↘ leaves	node-shape	hexagon (sealed)	RIGHT · DATA FLOW The same agents render again, mirrored across the spine. Edges are abzu-deep blue dashes — marching dashes when active. Direction follows the actual cortex pulse path: DEEPSEEK → OPENCLAW preflight → HERMES → CASSANDRA → SWARM → OBLITERATUS gate. <table><tr><td>edge</td><td>dashed abzu-deep</td></tr><tr><td>direction</td><td>cortex pulse</td></tr><tr><td>node-shape</td><td>circle (open)</td></tr></table>	edge	dashed abzu-deep	direction	cortex pulse	node-shape	circle (open)
edge	solid gold												
direction	enki ↘ leaves												
node-shape	hexagon (sealed)												
edge	dashed abzu-deep												
direction	cortex pulse												
node-shape	circle (open)												

THE SPINE

Single 1px luminous line at $x = 960$. Color `#D4AF37` at `opacity 0.7`, dashed `4 3`. The same node renders on both sides of the spine; the spine is the reflection plane. Hovering a node on one side highlights its mirror on the other. There is no “flip” — the duality is permanent.

Authority and information are the same thing rotated 180°. The mirror axis admits this directly.

STRUCTURE

Three radial arcs, one spine

- solid · gold authority invocation
- hexagon · sealed authority node
- dashed · abzu data pulse flow
- circle · open data node

CANONICAL IDS (NO INVENTION)

ENKI · OPENCLAW · HERMES · ARGUS · OBLITERATUS · CASSANDRA · SWARM · OC_AGENT

INVENTORY

What sits where

R = 130 · INNER ENKI nucleus, x=960 OPENCLAW bridge cap HIGH HERMES native fc	R = 260 · MIDDLE ARGUS tool gate OBLITERATUS adversarial QA CASSANDRA foresight (native)	R = 400 · OUTER SWARM dual fan-out OC_AGENT channel surface skills hover-only halo
--	---	---

TIER CLASSIFIER · 4 STATES

trivial	— no advisors, ENKI direct
standard	DEEPSEEK preflight only
complex	DEEPSEEK + OPENCLAW + HERMES_FC + CASSANDRA
critical	full ensemble + SWARM fan-out + OBLITERATUS gate

AUTHORITY BOUNDS

OPENCLAW is **bridge_advisory**: severity capped at HIGH, never impl authority, never canonical memory authority without local verification. ARGUS + HERMES are always-on native gates and cannot be bypassed. OBLITERATUS is the pre-promotion adversarial blocker — invoked on high-stakes changes only. ENKI is the only final authority.

DISCIPLINE

Single-weight, single-curve, fluid

Dark Netflix (dark.netflix.io) was studied as a duality reference; three patterns were extracted and applied here. The patterns are not the design — they are the discipline imposed on it.

TYPE · WEIGHT 300 UNIVERSAL

Every glyph in the system is **font-weight: 300** — display, body, mono. Hierarchy is built by *size* and *color*, never by weight. JetBrains Mono for technical text; Inter for everything else. Letter-spacing tightens at display sizes (**`-0.015em`**), widens at micro labels (**`0.1em`**).

MOTION · SINGLE EASING CURVE

`cubic-bezier(.455,.03,.515,.955)` — the only timing function in the system. Hover transitions **240ms**, layer reveals **480ms**, ambient pulse **2400ms** sinusoidal. No bounces. No spring. The curve is a held breath, not a snap.

FLUID · CLAMP() SIZING

All major typography uses **`clamp(min, fluid, max)`**. The instrument scales with viewport without breakpoints. Display: **`clamp(28pt, 4vw, 44pt)`**. Body: **`clamp(10pt, 1.2vw, 12pt)`**. Labels remain pinned at **9pt**.

SYMBOL · TRIQUETRA

The triquetra (triple-arc knot) appears at the spine head — a single 24px glyph in gold (#D4AF37). It echoes the three radial arcs and the three-state mirror (left / spine / right). Used once per view, never as decoration.

BEHAVIOR

How the instrument responds

hover · node	240ms ease — opposite mirror highlights at 0.6 opacity
hover · skill halo	skills (r=400+) reveal name only on hover · pinned tooltip
click · node	right-drawer slides in (320px) · clip-path corner notch
scroll	ambient canvas pauses at scroll-start; resumes 500ms after stop
selection	canvas opacity 0.18 → 0.06 while text selected
reduce-motion	respects @media — ambient disabled, transitions ≤80ms
spine pulse	2400ms sinusoidal opacity 0.5 ↔ 0.85, gold
advisor active	node ring grows by 2px, abzu-deep dashes march 2.4s loop

NO TOGGLE, NO MENU, NO CHROME

The instrument has no settings panel, no nav bar, no top chrome. State is read by looking at the system, not by clicking into menus. Everything is on-canvas. The only DOM overlays are the right-drawer (on click) and the tooltip (on hover).

A workshop hammer has no settings panel. Yuri OS is an instrument, not a product.

REVIEW GATE

Implementation is gated on this page

The v4 specification above is locked across identity, palette, topology, taxonomy, typography, motion, and interaction. The implementation step replaces the current `yuri-os-dashboard.html` (v3) with the mirror-axis SVG layout described in sheets 02–03 — single-shot via codex-mini, gated on this decision.

DECISION · 2026·05·14

☐

YES — proceed to v4 HTML implementation

Replace `yuri-os-dashboard.html` with v4 mirror-axis layout. Single-shot codex-mini, EOT-014 split prompts.

☐

NO — hold v4, keep v3 as canonical

Archive design sheet to `_SYSTEM/SELF-IMPROVEMENT/design-archive/2026-05-14/`. Revisit later.

☐

REVISE — proceed only after specific changes below
